om

Hi,

My name is Mojtaba Tavakkoli 26 Years old. I graduated from Persian Gulf university in 2019 and served 2 years in Technical and Professional organization as conscript.

Programming was always my choice and I love the challenges I always face forward. I've been working with different languages and platforms till now that I'm settled at Dart language and Flutter framework for more than 3 years.

Also have some knowledge and experience in server side languages such as PHP and Go and Databases.

Have a good experience in product design and UI and also UX design so I always design my own products and graphics in projects.

Been working as a freelancer for about 4 years. Always liked to be a part of big and talented team to learn even more from them and make more projects done together.

EDUCATION
Persian Gulf university
2015 - 2019
